PHI ALPHA SOCIETY WINS IN ANNUAL FRESHMAN DEBATE

Defeat Sigma Pi in Debate on Minimum Wage Question by Two to One Decision-Team Chosen to Meet Bradley.

several states should adopt a min-The contest was a warm one and oria, March 6, the judges selected as Mangner and Joseph Looney tied for the third place on the team. The affirmative of the question, were Harlow Brown, William Berryman and Clay Apple and the Phi Alpha contestants were Edward Korsmeyer, Joseph Looney and Thomas Mangner. The judges were L. O. Vaught, E. E. Crabtree and the Rev. H. R Neely. President C. H. Rammelkamp acted as chairman.

The affirmative contended that the minimum wage is necessary on account of the prevailing poverty and weakness in the social structure and that such a policy for unskilled labor would remedy quicker than anything else the neglect of home life, discrimination in favor of cheap labor, and unjust competition among employers arising from the existence of employes on less than a living wage. They asserted that it would be practical in operation, that it would be in harmony with recent industrial legislation and that it would introduce no new The negative said that a minimum wage law could not be enforced, that state competition would nullify whatever good results there It would not benefit the laborer even if enforcible as the legal minimum would tend to become the real maximum and unemployment would show a great increase. Present evils are due to an oversupply of labor, therefore the only way to give relief is to strike at the cause and limit supply by restricting immigration, discouraging the labor of women and abolishing child labor.

Mexican Statesman Sent to Get Aid For Huerta From Japan.

Photo by American Press Association

The mission of Francisco de la Barra, the Mexican statesman, in Japan has aroused the keen interest of Americans, especially the authorities in Washington. De la Barra was sent, from all indications, to enlist the support of Japan for the Huerta government. Huerta depends on Japan for arms and money in his defense against the rebels, and De la Barra's experience in diplomacy is expected to be a valuable aid in getting support from

White Little Spots. Scratching Made Them Worse. Cuticura Soap and Ointment Cured.

1261 Marion Place, Chicago, Ill. - "I had eczema for four or five years. One day I came into the house and saw some white little spots coming out on my hands. A week later I saw that the spots began opening and in their places came deep holes. Later it

took the form of some red little spots. Those spots itched me terribly and every night when I was asleep I always used to scratch and make the spots worse and made some new spots. The trouble caused loss of sleep.

My hands cost my father a fortune. I used remedies for three and one-half years but they made me worse. I used which helped a little bit, but in a day or two it got worse; also on I heard of Cuticura Soap and Ointment. I used Cuticura Soap and Ointment two times a day, in the morning and at night before going to sleep. Cuticura Soap and Ointment afforded relief in one or two weeks. and it only took two months before the cure was complete." (Signed) Clement

Levinson, Nov. 22, 1912. Although the Cuticura Soap and Ointment are most successful in the treatment of affections of the skin, scalp, hair and hands, they are also most valuable for everyday use in the toilet, bath and nursery, because they ote and maintain the health of the skin and hair from infancy to age. Sold everywhere. Liberal sample of each mailed free, with 32-p. Skin Book. Address post-card

HOAXING A PREMIER.

A Sequence of Practical Jokes That Riled M. Barthou.

M. Barthou, the French prime minister, is an excellent host, and his dinners always attract a select gathering of wit and talent. The other day an official looking personage visited a printer who does work for M. Barthou and ordered some invitation cards for a dinner to be given by the premier at his private residence. The man had all the appearance of an "attache de cabinet," and the printer executed the order without question. A few days afterward fifty of M. Barthou's friends received invitations, and thirty of them hastened to accept.

When the premier received the first acceptance he questioned his secretary who naturally knew nothing about it Then other acceptances poured in, and M. Barthou reflected on what course to take. In the end he decided to hold the function which had been forced on him, and the other evening his thirty friends ate a good dinner at his expense. Over the coffee and cigars he told his story after every one had been wondering what happy occasion the dinner party was to celebrate. After the first shock of the news the diners, most of all M. Barthou, laughed heartily at the humor of the situation.

What is not amusing is that the practical joker was not satisfied with his first success, but has again sent out cards. This time M. Barthou fails entirely to see the joke and has placed the matter in the hands of the police.

LATEST IN RAILWAY TICKETS.

The Agent Presses a Button and a Ma-

chine Does the Rest. The very latest way of selling railread tickets is for the ticket agent when a ticket to Pittsburgh or to Cos Cob is requested to simply push a button and thus set a machine at work picking out the type for that ticket, putting it in place, inking it, placing a piece of cardboard over the type and then printing the ticket. The machine hands out the freshly printed ticket in less time than it takes the ordinary ticket seller to select a printed ticket from his rack and stamp the date on the back of it.

Ticket printing machines appeared a few years ago, but it is only within the last few months that a machine has been developed which will do all the work on pressure of a button. The advantages of the machine to the rail roads are many, and if experience shows they are always reliable and do not cost too much for their service they will be generally adopted. As it is now tickets are checked up almost like cash at a vast amount of trouble and time. A ticket printing machine is

locked, so no one can tamper with it. Every time a ticket is printed a separate record is made on a slip for the agent to keep his accounts and one for his superiors, by which his accounts register, in other words.-Saturday Evening Post.

Genuine Beggar Poet.

France possesses a genuine beggar poet in Germain Nouveau, a close friend of Paul Verlaine, who has published a number of ballads and sonnets over the pseudonym "Ifumilis." A selection of these issued in book form some years ago was very favorably received. In one of the notices of his work the author was described by a critic who knows him personally as "a man soured by poverty. Who bination, mail and baggage car with declines to allow his lot to be bettered." Nouveau lives at Aix en Provence, mainly on the alms of the charitable, and is frequently to be seen on Sundays amid the throng of beggars who line the approach to the cathedral.-London Chronicle.

Try a Starch Bath.

It comes from Paris, the latest beauty hint. A society woman of the French capital has made a wonderful discovery. It is a starch bath, A pound of starch dissolved in a saucepan full of hot water is poured into the well filled bathtub at blood heat and then the bath is taken for twenty minutes with all but the face and hair immersed. The result is quieting to the nerves, a delightful sense of exhibaration, and a soothing effect upon the skin. This bath should be taken before breakfast or before dress: dinner. For the limp or washed out, it does what a laundress does to a crumpled shirt.-Leslie's.

They Die Young In Greenland. Neither old age nor matrimony is at all popular in Greenland, according to the latest census of that country. which also sets forth the fact that civilization has imposed its restrictions even on this remote realm with such effect that during the last decade there have been so far as the public was aware but three inhabitants of the region who possessed more than one wife each. There are only twenty-six men and forty-four women who have passed beyond the age of sixty years, and in every thousand of the population there are 650 unmarried, 319 married and 31 widowers.-New York Her-

Tart Criticism. A gentleman of antiquarian tenden-

cies who loved the drama of another day and another school was fured to New York and invelgled into a theater where a much discussed play dealing with sociological problems was being performed. He stuck it out to the end, and when he was asked to give his opinion of the work he said, "I think that over the door of the theater there might well be hung one of the old English inn signs, Entertainment for man and beast."-New York Tribune.

Genesis of the Phonograph.

As long ago as 1895 Sir W. H. Preece. theh director of the British postoffice telegraphs, sent messages without wires across the sound of Mull when the case and especially gained in the submarine cable was broken down. Sir . William was also present at the birth of the phonograph. In 1877 he spent Independence day with Edison at his house in New York, and in discussing the telephone he remarked to market just before the close. It was the great American inventor, "Then if also asserted that only the eastern what you say is true it will be possible third of Nebraska was at present to reproduce the human voice." Edi- protected by snow. son shut his eyes, said nothing, and the conversation changed. On the voyage home Sir William worked out a phonograph in theory, but, not being a mechanic, left it as an idea. In less than a month Edison sent Sir William United States and that thaws might came to England.-London Graphic.

Did as She Asked Him. A teacher in a tenement district hurried from the school to find the mother

of a pupil who had been taken ill. "Can you show me where Mrs. An gelo Scandale lives?" she inquired of a cherub transplanted from the sunny south to a dark, sunless alley.

"Yes, teach', I show you," and a will ing, sticky hand dragged her on with such speed as to make her stumble over an Italian dame seated on the threshold. After the teacher's breathless flight toward the clouds the little hand stopped tugging. "There where Mees Scandale live,"

16c WHEAT FOR MAY DELIVERY TOUCHES YEAR'S HIGH PRICE

Closing Figures at Top Level of Day Corn Bulges on Account Wheat Strength-Trade Light In Oats.

(By Associated Press.)

CHICAGO, Feb. 17.-Wheat for May delivery touched today the highest price of the year. Active demand from Europe was responsible. Closing figures were steady at virtually the top level of the day, an advance of %c to %@%c net. Other grain, too, showed an upturn-corn %c to %c and oats %c to %c. In provisions the outcome was 21/2c to 5c decline. Trading in wheat broadened out much more than has recently been

heard from at Philadelphia, St. Louis and Kansas City as well as here. Kansas reports of crop. damage had a bullish effect on the wheat Corn bulged on account of the

volume after the fact became ap-

parent that export call had been

wheat strength and in consequence of less favorable Argentine crop reports concerning late sown fields. There were signs also that feeding had become more general in the be expected which would put many country roads out of condition. In the oats trade, the smallness of

country offerings had a bullish influence. Eastern longs threw provisions over board, ribs in particular. The semi-monthly showing of stocks in warehouses had made holders uneasy. Commission houses, though, absorbed the offerings and aided by the upturn in grain overcame most of the loss.

No Longer Do Women Fear The Greatst of All Human Blessings.

It is a joy and comfort to know that those much-talked-of pains and other distresses that are said to precede child-bearing may easily be avoided. No woman need fear the silghtest discomfort if she will fortify herself with the well-known and time-honored remedy, "Mother's Friend."

This is a most grateful, penetrating, external application that at once softens and makes pliant the abdominal muscles and ligaments. They naturally expand without the slightest strain, and thus not only banish all tendency to nervous twitching spells, but there is an entire freedom from nausea, discomfort, sleeplessness and dread that so often leave their impress upon the

The occasion is therefore one of unbounded, joyful anticipation, and too much stress can not be laid upon the remarkable influence which a mother's happy, pre-natal disposition has upon the health and fortunes of the generation to come.

Mother's Friend is recommended only for the relief and comfort of expectant mothers, thousands of whom have used and recommend it. You will find it on sale at all drug stores at \$1.00 a bottle. Write to-day to the Bradfield Regulator Co., 130 Lamar Bldg., Atlanta, Ga., for a most instructive book on this greatest of all subjects, motherhood.

There is a wealth of instruction and comfort to be derived in reading this little book. It is plainly written, just what every woman wants to know, and will be a splendid little textbook for guidance, not only for yourself, but will make you helpful to others. And, in the meantime do not fail to get a bottle of Mother's Friend at the drug store, and thus fortify yourself against any and all pain and discomfort.

POSTPONES DECISION IN SUIT AGAINST THE BURLINGTON ROAD

Justice Thomson will Announce Finding Thursday or Friday— Railroad Intipduces No Evidence.

Nearly the entire day was consumed in the justice court of W. E. Thomson Tuesday, with the hearing of the civil suit brought against Was One of Citizens Who Crossed the Chicago, Burlington & Quincy Railroad company by the City of Jacksonville. After hearing the ewidence and arguments of attorneys Justice Thomson postponed his decision until Thursday or Friday of

The suit is an action for debt for \$1000 in which it is charged the Burlington owes the city for an alleged violation of an ordinance which recently went into effect prohibiting the importation of intoxicating liquors into Jacksonville. The ordinance provides a penalty of \$50 for each offense and in its suit the city avers that, in the case cited there were two distinct violations, that of receiving the liquur constituting one, and delivering the shipment, making the second offense.

In support of its allegations the city introduced four witnesses, Clarence Duncan, Chief of Police Davis, City Clerk R. L. Pyatt and E. F. Mitchell, agent of the Burlington. The testimony tended to show that the liquor was ordered from Arenzville by Clarence Duncan, paid for with money furnished by the Chief of Police and that the liquor was shipped to the city and delivered by the Burlington, as ordered by Clarence Duncan. The city was represented by City Attorney P. P. Thompson affairs of his party. For a great assisted by J. H. Danskin and Attornary was a trustee of the ney W. T.
